

# IHPCP 2023-2024 Update

JOINT FEEDBACK REPORT RESULTS, IMPROVEMENT  
PRIORITIZATION, AND CURRENT PROGRESS

Cheryl Henne, Division of HIV Health  
Dr. David Givens, HPCP

# What will we cover today?

- Joint Feedback Positive Results
  - Overall report findings
  - Positive highlights
- Joint Feedback Improvements
  - Improvement list
  - Any questions about these items? This is an introduction for a larger prioritization discussion in Nov.
- List of IHPCP work-in-progress:
  - 2023 HPG IHPCP recommendations

In the coming month you will receive for consideration and Nov. discussion:

- Updated Epi snapshot
- Workgroup recommendations
- 2024 HPG IHPCP recommendations

# Joint Feedback: Positive Results

A note about the data

## Section 1: Introduction

Highlight: the specific design of the Executive Summary was a novel element in PA's 2017 plan, and now these same elements are national requirements in the 2022 Plan guidance

## Section 2: Community Engagement and Planning Process

Highlight: the stakeholder engagement efforts outlined in PA's 2022 Plan were esp. recognized as compelling and robust. Reviewers also complimented how all qualitative data from stakeholders was codified and incorporated into the decision making and justification processes for the activities in Section 5.

# Joint Feedback: Positive Results

## Section 3: Contributing Data Sets and Assessments

Highlight: none

## Section 4: Situational Analysis

Highlight: reviewers noted the thorough description of priority populations

# Joint Feedback: Positive Results

## Section 5: 2022-2026 Goals and Objectives

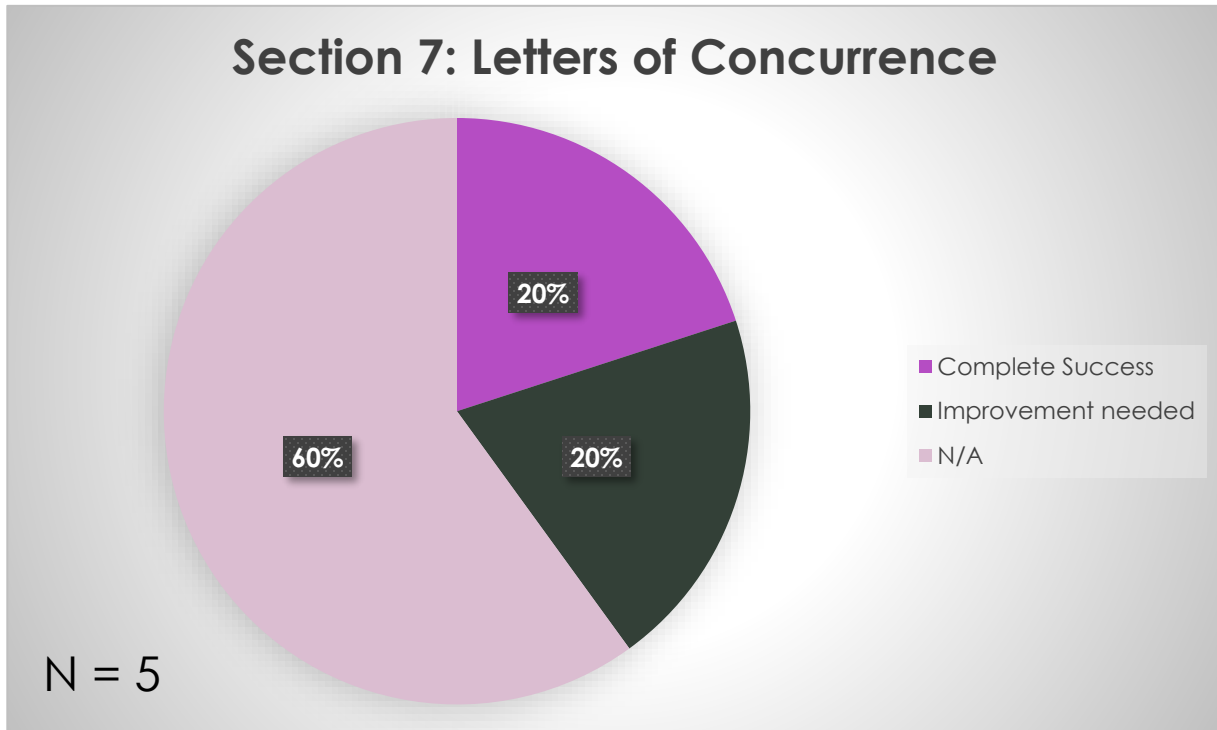

Highlight: approval of usage of SMART goals; commended the inclusion of disparity and priority metric data in strategies (recommended we make them more prominent); had praise for the development of the Support pillar as above and beyond guidance requirements.

## Section 6: 2022-2026 Integrated Planning Implementation, Monitoring, and Jurisdictional Follow Up

Highlight: wholly sufficient; review had no negative feedback

# Joint Feedback: Positive Results

Highlight: the HPG Letter of Concurrence holds an impressive 100% member concurrence.

Questions? Comments?

We'll talk about areas for improvement next!

Note: the improvement need cited was for an explicit letter of concurrence/cooperation from Philadelphia's Part A planning body, though reviewers noted that this was not made clear in the guidance. PA has already obtained and submitted this letter to HRSA, and it is ready for formal inclusion in the next update.

## 2023 HPG Recommendations - Evaluation:

- Strategy 1E:
  - The Division should develop a communications plan/protocol regarding updating and advertising the state condom ordering form
  - The Division should develop a distribution plan to ensure condoms nearing expiration are given priority usage or destroyed
- Strategy 2C:
  - The MAAETC and Division should articulate in the IHPCP a process/MOU for informing PPAs of MAAETC clinical trainings to improve impacts on priority populations
- Strategy 3A:
  - The subcommittee recommends The CQM [CQI] workgroup work towards developing all reports using 12-month data as it becomes available.
- Strategy 3B:
  - SPBP should consider tracking responses and potential solutions to barriers identified by clients for medication adherence
  - The Division should update Case management training to add education on SPBP and medication adherence in general
  - The IHPCP data benchmark should be updated from 90% to 95% to reflect the correct federal benchmark
- Strategy 5B: the Division should:
  - clarify required trainings for specific regions' fiscal agents
  - require refresher trainings on certain topics so employees remain up to date on the trainings as they change (due to new policies and new evidence-based research)
  - continue assessing whether/which Continuing Education trainings should be required
- Strategy 5C: the Protocols Workgroup should:
  - require new members to join a subcommittee after a certain amount of time, rather than just suggesting they join
  - allow for regional disability agencies and possibly regional Corrections agencies to become planning partners, while still prioritizing a statewide department being involved

# IHPCP work-in-progress

In the coming month, to prepare for the November meeting, you will receive for consideration and discussion - i.e. a possible IHPCP revision vote:

- Updated Epi snapshot
- Workgroup recommendations
- 2024 HPG IHPCP recommendations
- The letter of concurrence from Philadelphia Part A
