Benefits 201: Deep Dive for HIV Case Managers (Virtual)

Start Time - 9:00 am ET

End Time - 12:00 pm ET

Presented by Virginia Commonwealth University Regional Partner of the MidAtlantic AETC.

Due to high demand, this class is being offered in a virtual format over 3 sessions.

Attendance at all three sessions is required to receive credit.

This program is designed for eligibility specialists, medical and non-medical case managers, housing case managers, CHARLI case managers, patient navigators, community health workers, nurses, and support staff who assist clients in navigating social welfare programs.

Upon completion of this program, participants will be able to:

- Correctly identify HIV clients who may be eligible for Medicaid in Virginia and ways to enroll clients
- Define TANF, SNAP, WIC, and other programs
- Explain differences in eligibility and enrollment processes for housing programs
- Define eligibility criteria and application procedure for the four VAMAP programs available in Virginia
- Explain the differences between SSI & SSDI
- Identify what type of HIV clients are appropriate for the SOAR program and where to find additional services for SOAR

- Correctly name the various parts of Medicare, what's covered by each type, enrollment processes, and guidelines, as well as resources for helping to pay for Medicare.

Interactive HIV Panel - Unity in Care: An Interprofessional Approach to HIV Management (Virtual)

Start Time - 4:30 pm ET

End Time - 6:30 pm ET

Presented by West Virginia University Regional Partner of the MidAtlantic AETC.

Join Us for an Interactive Multidisciplinary HIV Panel!

Are you ready to engage in a dynamic discussion about the realities, opportunities, and future of HIV care? Join our panel of experts from diverse fields—physicians, nurses, lab specialists, and social workers—for an enriching experience that explores the vital role of collaboration in HIV management.

What to Expect:

Interactive Discussions: Connect with fellow healthcare professionals or future professionals dedicated to improving HIV outcomes. This inter-professional collaboration highlights the importance of teamwork in HIV care.

Expert Insights: Hear from our panelists about their unique perspectives and best practices in managing HIV.

Q&A Session: Bring your questions and engage directly with the experts to gain valuable insights.

Integrating HCV Treatment into HIV Treatment, for Medical and Behavioral Health Providers (Virtual)

Start Time - 8:45 am ET

End Time - 1:30 pm ET

Presented by Philadelphia/Health Federation Partner of the MidAtlantic AETC.

This course is designed for medical professionals who are interested in providing onsite treatment and cure to people living with HCV and HIV. It covers medication management and considerations including drug interactions, patients with co-occurring conditions including HIV, social drivers of health and substance use disorders. The training also provides information on prior authorization removal for Pennsylvania, patient education resources and treatment adherence strategy recommendations. Priority registration is given to providers practicing in Philadelphia.

The first session is didactic, and the second session is a clinical case discussion on HCV mono-infected patients.

LEARNING OBJECTIVES:

- Describe medical management of HCV and HIV
- Identify when to initiate change in medications and manage complications
- Apply current research for patients with a substance use disorder & HCV/HIV

This program is sponsored in collaboration with the Viral Hepatitis Program (Division of Disease Control) of the Philadelphia Department of Public Health.
